

# Daniel Doe

## Senior Front End Engineer

@ web.star.dev@outlook.com 📍 Australia

### SUMMARY

Results-driven **Web Developer & Backend Engineer** with over 5 years of experience designing, building, and optimizing responsive, scalable web applications. Skilled at writing clean, maintainable code, integrating APIs, and implementing performance-focused solutions that enhance user experience. Strong background in project leadership and Agile delivery, with a proven record of reducing system downtime, improving efficiency, and driving cost savings. Passionate about leveraging technical expertise and collaborative leadership to deliver innovative digital solutions.

### PROJECTS

#### Dynamic Soccer App: Real-Time Scores & Player Stats

08/2019 - 06/2020

Front-end Engineer

- The successful outcome of my work as a frontend developer was the creation of a highly responsive, user-friendly interface that delivers real-time soccer scores and player statistics.
- I optimized the performance of the application by implementing efficient state management and integrating WebSocket technology for live updates.
- This resulted in a seamless user experience with instant data refreshes, reduced loading times, and smooth transitions, ensuring users could stay engaged and informed during live matches.
- The app's mobile responsiveness also contributed to higher user retention and satisfaction, as it performed consistently across devices.

#### E-commerce

09/2021 - 07/2022

Front-end Engineer

- I was responsible for implementing the product catalog, intuitive filters, and a streamlined checkout process.
- Additionally, I integrated secure payment gateways, ensuring seamless and error-free transactions for users.
- My focus on performance optimization, including lazy loading and responsive design, led to faster page load times and an improved user experience across both desktop and mobile devices.
- This resulted in higher conversion rates and increased customer satisfaction.

### SKILLS

React	Angular	Vue	MERN	NEXT	NUXT	MERN
MEVN	MEAN	PHP	Laravel	CakePHP	WordPress	
Python	Django	Flask	FastAPI	MySQL	MongoDB	
PostgreSQL						

### EDUCATION

#### Bachelor's Degree of Computer Science

Charles Darwin University

01/2015 - 04/2018

- Gained a strong foundation in computer science principles, proficient in programming languages (Java, C++, Python, JavaScript), and experienced in full-stack development including web (HTML, CSS, JavaScript, PHP, SQL) and mobile (React Native, Flutter) applications.
- Developed skills in software development methodologies (Agile, Scrum), system design, database management (MySQL, MongoDB), and research. Enhanced problem-solving, teamwork, and continuous learning abilities through coursework, projects, and internships.

### EXPERIENCE

#### Backend Developer

10/2022 - 06/2023

- Designed and developed **RESTful APIs** using **FastAPI**, enabling seamless integration between frontend applications and third-party services.
- Built and maintained scalable backend systems with a focus on **performance, security, and reliability**.
- Collaborated with frontend developers, UX designers, and product managers to deliver new features and enhance existing functionality.
- Implemented **unit tests and API documentation** to ensure maintainability and support cross-team development.
- Additionally, I stayed updated with the latest web development trends and technologies to incorporate best practices and innovative solutions into my projects.

#### Frontend Developer

10/2023 - 12/2024

- Developed and deployed a **Progressive Web App (PWA)** using **React** for the frontend and **Laravel** for the backend, delivering a seamless cross-platform user experience across web and mobile.
- Collaborated with UI/UX designers to translate wireframes into high-quality, user-friendly interfaces.
- Deployed and maintained the project in a cloud environment, ensuring scalability and high availability.
